

Call for Board Member Applications

think2perform RESEARCH INSTITUTE (t2pRI) serves to unlock innovations in leadership by leveraging scientific research to inform and improve real life situations. Through deeper, data-based explorations of human and organizational development, we seek to enhance and expand the influence and effectiveness of individuals and organizations.

t2pRI advances moral, purposeful and emotionally-intelligent leadership through research, publication and skill development. First, we invest in thought-leading leadership research. Once this research has been completed, we share the results with others through their publication. The practical applications of this research are formulated into skill-development seminars for current and emerging leaders, including youth who participate in our 18-month [Future Leaders Academy](#) program.

Mission:

- think2perform RESEARCH INSTITUTE advances moral, purposeful and emotionally intelligent leadership to inspire and engage current and emerging leaders.

Guiding Principles:

t2pRI is guided by the values of humanistic and organizational psychology. We believe that when people are treated well, we perform more productively and experience greater satisfaction.

Research Process:

t2pRI promotes the application of scientific methods in management by bringing research findings to the world for practical use. With the intent of producing, promoting and disseminating interdisciplinary research, t2pRI selects [Fellows](#) to conduct primary research aligned with their research focus. We then support their scholarship with access to coaching and mentoring from successful leaders in the field. All fellows, associates and board members are committed to maintaining high-ethical standards in all research.

Research is available to organizations and individuals through a number of channels including through the t2pRI website, publications, videos, seminars and conference presentations. In addition, we offer informational events to increase understanding and useful application of the insights derived from the research.

We are currently seeking 2 Board Members who are committed to our advancing our mission:
